OBJECTIVE

A adaptable and approachable professional with strong leadership skills and a passion for continuous learning. Skilled in problem-solving, teamwork, and quickly adapting to new environments. Seeking to apply my technical knowledge and interpersonal skills in an Software Engineering role to provide efficient solutions and excellent service.

PROJECTS

Virtu Gallery
Project Manager and Full stack Developer | 2024

- Led the development team in planning and building a web-based digital gallery, coordinating tasks and development activities, resulting in successful project completion.
- Implemented CRUD operations and system functionality, integrating user inputs with database operations, resulting in streamlined gallery content management.

Mapos Catering
Project Manager and Backend Developer | 2025

- Led the development team in planning and developing a catering management system, coordinating tasks and monitoring project progress, resulting in the successful completion of the project.
- Developed backend functionalities and implemented CRUD operations for system modules, integrating application logic with database operations, contributing to efficient data management and successful project delivery.

Saulado — Reviewer App
Full stack Developer | 2026

- Developed a cross-platform study application for web and mobile that converts user-provided paragraphs into fill-in-the-blank questions, supporting active recall and self-paced learning.
- Implemented offline-ready study features that allow users to access study materials and review questions without an internet connection, enabling uninterrupted learning even when offline.
